
**Region 3 Plan Summary
York, Pennsylvania 8-Hour Ozone Area**

Title: Maintenance Plan for the York, Pennsylvania 8-hour Ozone Attainment Area

Federal Register Dates: October 24, 2007, 72 FR 60296 (Proposed Rule); January 14, 2008, 73 FR 2163 (Final Rule); **Revised:** August 13, 2009, 74 FR 40806 (Proposed Rule); 74 FR 40747 (Final Rule).

EPA Effective Date: February 13, 2008; revision effective October 13, 2009.

State Submittal Date: June 14, 2007; revision submitted May 23, 2008.

Affected Area: Adams and York Counties

Key Features:

1. 2004 attainment year; projections to 2009 and 2018.
2. The York Area maintenance plan shows maintenance of the 8-hour ozone NAAQS by demonstrating that current and future emissions of VOC and NO_x remain at or below the attainment year 2004 emissions levels throughout the York Area through the year 2018.

Monitoring Network: There are currently two monitors measuring ozone in the York Area. PADEP will continue to operate its current air quality monitor (located in York and Adams Counties), in accordance with 40 CFR part 58.

Contingency Plan Triggers:

1. Contingency measures will be considered if for two consecutive years the fourth highest 8-hour ozone concentrations at the York and Adams Counties monitors are above 84 ppb. If this trigger point occurs, the Commonwealth will evaluate whether additional local emission control measures should be implemented in order to prevent a violation of the air quality standard.

2. Contingency measures will also be considered in the event that a violation of the 8-hour ozone standard occurs at the York and Adams Counties, Pennsylvania monitors.

Contingency Measures: Contingency measures to be considered for the York Area will include, but not limited to the following:

Non-Regulatory Measures:

1. Voluntary diesel engine "chip reflash" - installation software to correct the defeat device option on certain heavy duty diesel engines.

2. Diesel retrofit, including replacement, repowering or alternative fuel use, for public or private local onroad or offroad fleets.

3. Idling reduction technology for Class 2 yard locomotives.

4. Idling reduction technologies or strategies for truck stops, warehouses and other freight-handling facilities.

5. Accelerated turnover of lawn and garden equipment, especially commercial equipment, including promotion of electric equipment.

6. Additional promotion of alternative fuel (e.g., biodiesel) for home heating and agricultural use.

Regulatory Measures:

1. Additional controls on consumer products.

2. Additional control on portable fuel containers.

Schedule: The plan lays out a process to have any regulatory contingency measures in effect within 19 months of the trigger. The plan also lays out a process to implement the non-regulatory contingency measures within 12-24 months of the trigger.

Total VOC Emissions for 2004-2018 (TPSD)

Source Category	2004 VOC emissions	2009 VOC emissions	2018 VOC emissions
Point*	5.3	8.2	10.1
Area	26.8	26.2	28.9
Mobile**	21.3		
Adams County		3.84	2.34
York County		12.09	6.72
Nonroad	10.1	8.4	6.9
Total	63.5	58.7	54.9

* The stationary point source emissions shown here do not include available banked emission credits as indicated in Appendix A-4 submitted with the maintenance plan.

** Includes safety margin identified in the motor vehicle emission budgets for transportation conformity.

Total NOx Emissions for 2004-2018 (TPSD)

Source Category	2004 NOx emissions	2009 NOx emissions	2018 NOx emissions
Point*	75.3	74.1	79.7
Area	3.0	3.1	3.3
Mobile**	31.9		
Adams County		4.87	2.54
York County		17.96	7.50
Nonroad	13.7	11.2	6.5
Total	123.9	111.2	99.5

* The stationary point source emissions shown here do not include available banked emission credits as indicated in Appendix A-4.

** Includes safety margin identified in the motor vehicle emission budgets for transportation conformity.
